Novelty and Specialty General

TRADE LIST

OF "CALIFORNIA'S CHOICEST FLOWER SEEDS . . . SINCE 1890"

Prices in this List are effective at once for all sales from 1937 crop during the remainder of 1937 and the spring of 1938. This Trade List will be in effect until issuance of our 1938-39 Novelty and Trade List in August, 1938. We do not expect to issue an Advance Contract List in 1938.

Bodger Seeds, Ltd.

WHOLESALE GROWERS

LOS ANGELES COUNTY F.J., MONTE CALIFORNIA, U. S. A

CABLE ADDRESS: Registered "Bodger El Monte" All Codes

Our up-to-date, early California style office building at El Monte

Terms and General Conditions of Delivery

ALL SEEDS are quoted F.O.B. El Monte, California, for delivery after harvest crop 1937, 60 days net, less 2% cash 30 days. All invoices payable in U.S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable. There will be no charge made for bags smaller than the one pound size $(5x7^{1}/2)$ inches).

We reserve the right to change any or all prices in this list without notice.

For every order, we agree to plant sufficient land to produce the desired quantity of seed under normal conditions.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

We give no warranty, express or implied, as to description, quality, purity, productiveness, or any other matter of any seeds we sell, and we will not be in any way responsible for the crop. If seeds are not accepted on these terms, they are to be held subject to our order.

BODGER SEEDS, LTD.

Prices

RICES quoted in this list go into effect immediately, superseding all previous quotations. As you will notice, we have discontinued the quarter-pound price. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate. We have eliminated charges on all bags up to the one-pound size $(5''x7^{1}/2'')$.

Shipping Information

Domestic: Time is important. Many of our customers use the Air Mail exclusively to save time and get the most possible out of our rapid order filling and delivery service. We suggest that you do the same. If your order is sent to us by Air Mail from the east coast it arrives the second day, is filled the same day it arrives and if shipped by Parcel Post seed will reach you within seven days from the time the order left your office. Correspondingly less time is needed when shorter distances are covered. For faster delivery, seeds shipped by Air Mail or Air Express will reach you within four days from the time your order is sent to us. For the greatest

possible saving in time, send your order by wire to be shipped by air; seeds will arrive within two to three days from the time ordered.

Contrary to the general impression, Air Express is not expensive. Rates are calculated on the basis of half pounds, and are very close to the ordinary Parcel Post rates. Air Mail, which is more expensive, is calculated on an ounce basis and goes as first class mail. Air transportation is no longer in the experimental stage; it is an established fact—safe, sure and economical.

Regarding rail shipments, both Parcel Post and Express will take 4 to 5 days to reach the east coast. When the shipment is over 10 pounds in weight it is cheaper to ship by express, but when it is less than 10 pounds Parcel Post is cheaper. Parcel Post packages marked "Special Delivery" are given first class mail service and will go through practically as fast as first class matter.

Shipments of 75 pounds or over can be sent most economically by Freight. Package cars leave Los Angeles twice a week, arriving in Chicago the 7th morning and in New York the 10th morning. Contract orders and others placed considerably in advance of the time needed should be sent by Freight.

Foreign: We urge our foreign customers to use the Air Mails when sending rush orders. Although there is as yet no regular Air Mail service across the Atlantic, there is a great saving in time on both sides of the ocean, and Air Mail letters are given preference over regular mail in all handlings. There is a place for Air Mail even with our Australian customers. If a fast boat has been missed, Air Mail will catch it a few hundred miles out at sea and save many days delay.

When sending orders by cable, we suggest the use of our number code to cut down on words and expense. Five numbers in a unit may be sent for the cost of one word, a rate which reduces costs considerably.

Bodger Service Department

Novelties: The amateur gardener is novelty conscious, and it is easy to sell a new variety. Novelties are your logical sales leaders, and it is decidedly to your own advantage to make good use of them in your newspaper publicity, your advertising, and your counter features in the store. Make your selections from among the novelties listed herein and you cannot go wrong.

Transparencies: Our new colored transparencies are your busiest silent salesmen. They are accurately hand colored, on film or glass, printed from our regular photographic negatives. Placed in your store window, on the counter, along the walls with the seed racks, or near the cash register, they attract attention at once, and show your customer the actual flower of the seed you have for sale. Write us for full details regarding transparencies and the cabinets in which to display them.

Electros: The very rapid increase in sales of our black and white electros and four-color nickeltypes convinces us that this branch of our Service Department has proved valuable to our customers. Included in this price list are some seventy new black and white electros in standard sizes and twenty-one new four-color nickeltypes.

We are at present compiling a 1937 supplement to our 1935 Electro Catalog which will contain all electros and nickeltypes we have had made since publication of our 1936 supplement. Besides electros of standard size this will include many of the smaller 1''x1'/2'' electros.

Photographs: Through our Photographic Service we are able to furnish you with a complete line of first class photographs of novelty and standard flower varieties. Photographs will be submitted for approval upon request.

Bulletins: The most ambitious effort of our Service Department is the publication of a series of bulletins on various flower subjects. Bulletin No. 1, The Zinnia and Its Uses, and Bulletin No. 2, Asters of Today, have been distributed and others will follow as soon as they are compiled. If you have not received copies of our Aster and Zinnia bulletins, write us and they will be forwarded promptly.

Hangers: To assist in retail store sales we have had prepared hangers of various popular flower subjects. These have been sent to you from time to time and we trust have proved of value to you in promoting sales.

One of our large farm units in the rich Lompoc Valley

1937-1938 BODGER INTRODUCTIONS

No. 534-NICKELTYPES \$15.00

Hollyhock Bodger's Annual Double Scarlet Beauty (Bodger)

FULLY double Hollyhock of the Chater type which will flower in six months from the time seed is sown—that is the outstanding characteristic of Bodger's Annual Double Scarlet Beauty. The size of flower and plant habit are identical with the Chater Hollyhocks, but this new annual can be sown in spring for summer flowers the same year. In color pure intense scarlet, gorgeously highlighting the garden scene, Scarlet Beauty is the first of what will later be a whole race of annual flowering double Hollyhocks of this type. In those sections of the country where Hollyhocks winter over with difficulty, this new annual double Hollyhock fills an important need, and for all gardeners it will save a whole year's time in growing. Plants will winter over where Chater varieties do, and the variety is classed as a perennial which blooms the first year from seed.

No. 4346 Price per oz., \$2.15 Per lb., \$25.00

Approximately 3,800 seeds per ounce.

No. 533-NICKELTYPES \$15.00

Tithonia Speciosa Grandiflora Fireball (Bodger)

AZZLING as a ball of fire poised high above other flowers, Fireball is, undoubtedly, the last word in brilliance of color in a fall blooming plant. Many who have known and enjoyed Tithonia Speciosa have considered it the brightest possible flower for fall use. With the introduction, however, of Fireball, this older variety is entirely overshadowed. Fireball is a very brilliant, vibrant shade of scarlet orange, the petals in dazzling contrast to the clear yellow center. The gaily colored flowers are single, very large, 4½ to 5 inches in diameter, and are carried on fine long stems. The plants are very tall, some reaching a height of 8 or 9 feet, with a fairly heavy growth of grayish green, woolly foliage. They are, however, neat in appearance, filling in well from the very base of the plant to the top, and unlike the older Tithonia Speciosa do not become ragged looking. In southern warm districts, seed should be sown in late spring outdoors, while in the northern sections it should be started indoors and the plants set out after danger of frost has passed. Tithonia Fireball is a tender annual, flowering late in the season, and is not subject to plant diseases. It is extremely showy in the garden and an excellent new cut flower variety. The flowers will keep five or six days when cut. We have every confidence that Fireball will be one of the headline flowers of the 1938 season.

No. 7722 Price per oz., \$1.30 Per lb., \$15.00

Approximately 4,000 seeds per ounce.

Petunia Giants of California Bodger's Supreme Florist Strain (Bodger)

FOR MANY years visitors to our growing grounds have admired our stocks of the Giants of California type of Petunia. We have been especially complimented on a strain of rose and pink shades which we have been working on for several years. This strain we are now offering as Bodger's Supreme Florist Strain. It is of the well known Giants of California type, with very large ruffled, shallow open throated flowers, freely produced on strong growing plants which may be as much as two feet tall by the end of the season. It is an excellent bedding variety as well as a fine window box type. Flowers are produced in less than 4 months from the time seed is sown, the first one appearing when the plant is only a few inches tall. We have for some years had a demand for this type of Petunia in a color range comprising the lighter rose and pink shades, and feel that it will be a welcome addition to the large florist type.

No. 5718 Price per 1/16 oz., \$5.00 Per 1/4 oz., \$15.00 Per oz., \$50.00

Approximately 162,000 seeds per ounce.

No. 535-NICKELTYPES \$15.00

Cuphea Firefly

In OUR quest for a plant which is dwarf, compact, neat in habit, and showy for modern gardens, it is a joy to discover Cuphea Firefly. A newcomer this season, Firefly has all the characteristics needed in a dwarf, compact plant. The flowers are small and delicately formed, fiery cerise red in color, and are freely produced on compact plants which reach a height of about 10 inches. The general effect of a plant when in full bloom is a ball of fire, recommending itself at once as a subject for the rockery, for window boxes, for flower pots, or as a border or edging variety. It is a tender annual flowering readily in twelve to fourteen weeks from seed, and blooms profusely throughout the summer months.

No. 3328 Price per oz., \$4.50

Approximately 7,200 seeds per ounce.

No. 536-NICKELTYPES \$15.00

Cosmos Sensation Pinkie and Purity (Bodger)

THE Sensation type of Cosmos is today the favorite for cut flower use. The fact that the flowers are of immense size, 4 to 5 inches or more in diameter, with broad heavy fluted petals which slightly overlap, giving a very full single flower, make it ideal for cut flower use. These large flowers are carried on very long strong stems and are freely produced on plants which reach a height of 3 to 4 feet and have a fairly heavy growth of foliage. The flowers are produced within 8 to 10 weeks from the time seed is sown. While the flowers are large enough for any ordinary use, some may prefer to disbud for even larger blooms. Pinkie is the delightful rose pink shade found in the popular mixture. Purity is the glistening white also found in the mixture. These two varieties are now available as separate colors for the 1938 spring trade.

Pinkie—No. 3200 Price per oz., \$.90 Per lb., \$10.00

Purity—No. 3202.... Price per oz., \$.90 Per lb., \$10.00

Approximately 5,500 seeds per ounce.

No. 386-ELECTRO \$2.25

Aster Wilt Resistant Giants of California Light Blue (Bodger)

ALL DURING the course of our experimental work in developing wilt resistant strains of Asters, it has been extremely difficult to obtain resistant strains of the Giants of California type. This year, however, we are particularly fortunate in being able to introduce a wilt resistant strain of the very popular color, Light Blue, in this excellent and popular Aster type. The flowers are large, fluffy, full petaled and of good substance in a clear shade of azure or Light Blue. The stems are long, with very few lateral branches, and the plants, which are about three feet tall, are of good sturdy growth. Flowers will be produced during the early part of September, earlier than the non-resistant giants.

No. 46 Price per oz., \$2.15 Per lb., \$25.00

Approximately 12,000 seeds per ounce.

Aster Giants of California Crimson (Bodger)

ALTHOUGH not wilt resistant, this new color in the Giants of California group will be welcomed. The plants are of the standard Giant type with long heavy stems, while the flowers are large and of good substance, with broad graceful petals. The color is a very brilliant shade of clear crimson, not previously known in this type. Florists and home gardeners alike have needed this color in the Giants of California Aster.

No. 80 Price per oz., \$1.70 Per lb., \$20.00

Approximately 12,000 seeds per ounce.

No. 368-ELECTRO \$2.20

Aster Wilt Resistant Crego Enchantress (Bodger)

WITH Enchantress, we are presenting an entirely new color in Asters—a luscious shade of lively salmon rose, distinct from all other colors yet developed. Both florists and home gardeners will be delighted with it. The flowers are large, of good substance, and are produced on free flowering, branching, wilt resistant plants, which bloom in early September.

No. 324 Price per oz., \$1.30 Per lb., \$15.00

Approximately 12,000 seeds per ounce.

Aster Wilt Resistant Giant Comet Illusion (Bodger)

STILL another new color in a wilt resistant Aster, Illusion is a soft, pastel shade of apricot pink, especially fine for cutting and most effective when used in combination with some blue flower, such as the Chinese Forget-Me-Not. The plants are upright, about two feet tall and very free blooming. Since the individual stems are short, it is customary to cut the whole plant as a unit when using the flowers for bouquets. The strain is wilt resistant and will flower during mid-August.

No. 256 Price per oz., \$1.30 Per lb., \$15.00

Approximately 12,000 seeds per ounce.

No. 335-ELECTRO \$2.25

No. 397-ELECTRO \$2.60

Poppy Nudicaule Imperial Jewels Mixture (Bodger)

DAZZLING as a rainbow shimmering in summer mist, scintillating as the Imperial Crown Jewels, the kaleidoscopic coloring of our new Imperial Jewels Iceland Poppy is a delight to behold. We are offering you in this Mixture the very finest and most outstanding Iceland Poppy yet produced. The mixture contains wonderful color shades, from light to very deep orange, all shades of yellow, creamy white and pure white, every imaginable shade of pink from shell pink to salmon pink, deep rose and nearly red tones and many pastel hues of apricot, buff and chamois. The variety of color tones is almost limitless. The flowers are beautifully frilled and fluted, many of them semi-double and all 4 to 5 inches or more in diameter. The stems are all extremely long, 20 to 24 inches, wiry and strong, and bearing flowers upright in regal splendor. Imperial Jewels Mixture is so far ahead of any other Nudicaule Poppy available, that no florist can afford to be without it for his best cut flower trade.

No. 5868 Price per oz., \$2.15 Per lb., \$25.00

Approximately 448,000 seeds per ounce.

No. 398-ELECTRO \$2.25

Morning Glory Scarlett O'Hara

FEW plants are easier to grow or give a more colorful and satisfying return for the care given them than the Ipomeas or Morning Glories. Scarlett O'Hara is an entirely new color in this popular flower—rich dark wine red or deep crimson. The flowers, while not as large as Heavenly Blue, are of good size, freely produced on fast growing vines which are very showy for covering a fence or trellis. The foliage, which is a fairly dark green, is not heavy, making a plant graceful in appearance. Scarlett O'Hara will undoubtedly be one of the popular Morning Glory varieties, especially in the southern warmer latitudes.

No. 4384 Price per oz., \$1.30 Per lb., \$15.00

Approximately 700 seeds per ounce.

Verbena Hybrida Grandiflora Meteor (Bodger)

THE flaming red of a meteor, contrasted with the shimmering white of winter snows—this is the combination found in Verbena Meteor, our new introduction. The extremely showy red and white flowers are not unusually large, but there are hundreds of them in flower on each plant throughout the summer months. Meteor is indeed one of the very gayest Verbenas yet developed and should find a permanent place in our garden picture. The strain is absolutely true to color and type, and is a strong robust grower.

No. 7892 Price per oz., \$1.30 Per lb., \$15.00

Approximately 12,500 seeds per ounce.

No. 399-ELECTRO \$2.60

Puya Alpestris (Green Irish Yucca) and Alpestris Coerulea

THE PUYA is a very showy and most remarkable plant which comes from the Chilean Andes and is related to the pineapple. It is large and strong growing, and when in bloom somewhat resembles a large Yucca, with flower stalks as much as six feet high. The flowers are most unusual in appearance, large and showy, produced in great number in a panicle of branches on the tall flower stalks. The plants remain in flower over a period of several weeks as there is a succession of buds from the stem outward. The most unusual characteristic is the color. Alpestris, or the Green Irish Yucca, is a striking bright metallic-looking Irish green shade, and Alpestris Coerulea has flowers of a rich dark indigo blue. The foliage is very ornamental, white on the underside and grey green on top. The plants are fairly resistant to cold, have stood a temperature of 20° F. in California and were not affected in any way. They would be perfectly hardy throughout the south and probably as far north as North Carolina, while in Australia and South Africa they should do extremely well. Puyas have been flowered in the south of England, in Wales, and in Ireland, but in these damper climates care must be taken to plant them near a dry wall for drainage and warmth in winter. The plants grow readily from seed, requiring approximately five years to flower, and need very little water after they are established. They will thrive in either a rich or poor soil, although they prefer a rich loam mixture.

Puya Alpestris No. 6052.... Price per pkt., \$.50
Puya Alpestris Coerulea No. 6054.... Price per pkt., \$.50

No. 365-ELECTRO \$2.10

Nasturtium Dwarf Double Gem (Bodger)

THE Gem Nasturtiums may be described as a dwarf, compact, streamlined form of the Gleam Nasturtiums. The flowers are identical with the Gleams, semi double and sweet scented and are carried above the foliage on stems which are of good length for cutting. The plants, however, instead of sending out short runners, as the Gleams do, are neat, compact and dwarf, 10 to 12 inches in height with a spread of 12 to 15 inches. Use the

Gems in a garden where space is limited and where the Gleams or stronger growing Nasturtiums would be out of place. As they maintain a neat, compact habit throughout the life of the plant, the Gems are fine for the rockery, for window boxes and as pot plants, while as an edging or border plant in the garden they are superb. We are introducing three new colors this year: Salmon Gem, a lovely soft golden salmon; Orange Gem, a strong clear orange; and Scarlet Gem, a brilliant fiery scarlet.

Salmon Gem—No. 5074 Price per oz., \$.20 Per lb., \$2.00

Orange Gem—No. 5068 Price per oz., \$.20 Per lb., \$2.00

Scarlet Gem—No. 5076 Price per oz., \$.20 Per lb., \$2.00

Approximately 175 seeds per ounce.

Marigold California Double Golden Dawn and Moonbeam (Bodger)

THE California Double type of Marigold is similar in habit to Guinea Gold, while the medium sized flowers, although very similar, differ from Guinea Gold in that the petals are decidedly wavy, almost fringed, giving a unique appearance to the flower. They are fully double and average 3 to 31/2 inches in diameter, while the plants are about 3 feet in height. The stems are of good length, making this a fine cut flower type. Golden Dawn is a lovely soft light golden orange, while Moonbeam is a clear lemon yellow. Both are worthy companions to the popular Guinea Gold.

Golden Dawn—No. 4718 Price per oz., \$.70 Per lb., \$8.00

Moonbeam—No. 4720 Price per oz., \$.70 Per lb., \$8.00

Approximately 10,000 seeds per ounce.

1936-1937 BODGER INTRODUCTIONS

No. 531-NICKELTYPES \$11.00

Marigold Gigantea Sunset Giants (Bodger)

CUNSET GIANTS, which we introduced last year, has been very favorably received. We have had many glowing reports on it, with special reference to the large size and sweet scented character of the flowers. Sunset Giants is the very largest Marigold yet developed, flowers in the field averaging about 5 inches in diameter, while those grown for show purposes have been known to attain a size of 71/2 or 8 inches. The definite sweet scent of the flowers adds to its value as a cut flower variety, as well as being a good garden plant. The full centered flowers of fairly loose formation, with broad heavy petals gracefully overlapping, are of great depth and even larger than the Dahlia Flowered Zinnias. The color range includes deep orange, golden orange, deep golden yellow, light yellow, lemon yellow and a delightful new shade of primrose. The plants are extremely robust, producing a heavy growth of foliage, with 6 to 8 heavy branches, each bearing 3 to 6 large flowers. Plants are usually 31/2 to 4 feet tall, but under extremely favorable conditions, have been known to grow as much as 7 feet. Flowers are produced about the middle of July in most sections of the country, in early June in the southern states, and can be depended on to flower well before frost in any latitude. Sunset Giants has been tested and found to be a fine forcer in the greenhouse. While a certain percentage of single flowers may still be expected in this strain, the excellence of the full doubles more than compensates for the singles.

No. 4998 Price per oz., \$.90 Per lb., \$10.00

Approximately 8,000 seeds per ounce.

No. 537-NICKELTYPES \$15.00

Zinnia Linearis

THE most unusual and interesting of the newer Zinnias is the little dwarf variety, Linearis. The flowers, which are single, are a lovely shade of golden orange, with a delicate lemon yellow stripe through each petal, while the center is dark brown in the young flowers, turning golden orange as the pollen develops. It is extremely early blooming, commencing to flower when the plants are about 6 inches tall and keeping on right through the season until the late frosts of autumn. It never looks untidy, as the dozens of newly opened flowers prevent the faded ones from becoming prominent. The plants reach a height of 8 to 10 inches and with plenty of room for development may have a spread of as much as 2 feet by the end of the season. The flowers are produced in great profusion, literally hundreds being open at a time. Linearis is an extremely valuable addition to the list of plants suitable for border or edging use and is excellent for window boxes or in any part of the garden where a dwarf growing plant with brilliant coloring is desired. It will start flowering about 6 weeks after seed is sown.

No. 1592 Price per oz., \$1.05 Per lb., \$12.00

Approximately 123,650 seeds per ounce

No. 538-NICKELTYPES \$15.00

Zinnia Fantasy Star Dust (Bodger) Award of Merit ALL-AMERICA SELECTIONS 1937

MONG the great variety of new Zinnia types recently developed, the Fantasy type has received more publicity than any other. Its shaggy informality immediately recommends it for cut flower use. Furthermore, since the flowers are of medium size, they are easily handled and can be arranged gracefully in bouquets either by themselves or in combination with other flowers. Star Dust, the lovely golden yellow variety in this popular type, has the characteristic informal, shaggy-petaled, medium-sized flowers, on plants 21/2 to 3 feet in height, with stems of good length for cutting. The plants are free blooming, making a fine show of color in the garden. Flowers may be expected 45 to 50 days after seed is planted.

No. 1344 Price per oz., \$.55 Per lb., \$6.00

Approximately 5,000 seeds per ounce.

No. 539-NICKELTYPES \$15.00

Zinnia Lilliput Pastel Mixture (Bodger)

WHILE there is a great diversification of type in the newer Zinnia introductions, the older types are still maintaining their popularity. This is particularly true of the Lilliput or baby Zinnia. Because of the neat, compact, symmetrical habit of the flowers together with their small size and stem length, they are particularly fine for cutting for bouquets in the home. When we think of flowers for cutting, our minds automatically turn to the pastel shades. Until this past season, there has been no strictly pastel variety in the Lilliput type. In the Pastel Mixture, however, we have incorporated the very lovely soft shades of apricot, peach, creamy yellow, shell pink, delicate salmon, light rose and orchid which are prime favorites with florists and cut flower growers. The plants are 12 to 15 inches in height, neat in habit, compact growing and very free flowering. It is one of the early blooming types, producing flowers about 45 days after seed is sown.

No. 1420 Price per oz., \$.33 Per lb., \$3.50

Approximately 4,600 seeds per ounce.

No. 541-NICKELTYPES \$15.00

Zinnia Pumila Dwarf Double Spun Gold (Bodger)

SPUN GOLD is one of the delightful, soft pastel shades so much in demand at the present time. The flowers, which are medium-sized, $2^{1}/_{2}$ to 3 inches in diameter, are ideal for cut flower use. The soft yellow combines beautifully with lavender, blue or pink shades for a soft treatment, or with the brighter reds and orange shades for contrast. The plants, which are neat in habit, grow 12 to 18 inches in height with strong stems of medium length, and are unusually free flowering. The common name for this type, Cut and Come Again, gives an idea of the free blooming habit. The more flowers picked, the more will be produced. The strain is early blooming, producing flowers about 45 days after planting.

No. 1460 Price per oz., \$.30 Per lb., \$3.00

Approximately 4,500 seeds per ounce.

No. 552-NICKELTYPES \$15.00

Verbena Hybrida Grandiflora Crimson Glow (Bodger)

VERBENA Crimson Glow is the finest and deepest red shade available in this popular garden flower. Rich, glowing crimson, the flowers are a solid mass of color, making a striking bed or border in the garden. Unlike other red Verbena varieties, there is no contrasting lighter eye to detract from the color tone. Individual florets are of good size, about an inch in diameter, carried in full clusters which are freely produced throughout the summer weeks. The plants are neat, semi-compact in habit, with foliage of the small type associated with Coccinea and Lucifer. For a brilliant, intense crimson accent in the garden, use Crimson Glow.

No. 7888 Price per oz., \$1.05 Per lb., \$12.00

Approximately 12,500 seeds per ounce

No. 530-NICKELTYPES \$11.00

Calendula Campfire Bodger's Improved Florist Strain (Bodger)

Some years ago we introduced a sensational new Calendula under the name of Campfire (Sensation). This variety has been a leader with florists since its introduction. Since then we have been continuing our selection work on it, and last year were able to introduce a vastly improved reselected strain of Campfire which is even better adapted to florist use. The flowers are more uniformly large and well formed, on plants neat and compact in habit. The color is now well known, a very deep strong orange with a distinct scarlet sheen on the upper side of each petal. While the center is light, this is scarcely ever noticed because of the complete doubleness of the flower. Blooms measure at least 4 inches in diameter and are of the characteristic flat topped formation demanded by the florist trade. The plants are strong growing and even in habit, with exceptionally long heavy cutting stems, produced in generous quantity on each plant. Since its introduction last year, this strain has more than fulfilled our expectations for it as a fine new florists' cut flower variety.

No. 2498 Price per oz., \$.35 Per lb., \$4.00

Approximately 5,200 seeds per ounce.

No. 308-ELECTRO \$2.75

Larkspur Giant Imperial White King (Bodger)

Special Mention 1937

ALL-AMERICA (A) SELECTIONS

THITE KING is without any question the finest Giant Imperial Larkspur developed since our 1930 introduction, Carmine King. The flowers are pure glistening white, of the characteristic Bodger Larkspur type, with rounded broad petals. The florets are extremely large and fully double, measuring as much as 2 inches across, and are evenly and closely spaced on the stem. This gives a very heavy Hollyhock-like cutting spike from 24 to 30 inches long. The plants are tall, of the true Giant Imperial basal branching type, and very early blooming, coming into flower more than a week earlier than other Giant Imperial varieties. For cut flower use, White King cannot be surpassed.

No. 4458 Price per oz., \$.45 Per lb., \$5.00

Approximately 8,770 seeds per ounce.

Larkspur Giant Imperial Coral King (Bodger)

With Coral King, we have presented an entirely new color in Larkspurs—blush pink with a strong suffusion of coral, which deepens and gets richer as the flowers mature, giving an impression of lovely delicate coral pink with a salmon tint. As in White King, the florets are very large, fully double and with rounded petals, but they are a little less closely spaced on the stem than in White King. There is a magnificent length of Hollyhock-like flowering spikes, averaging from 24 to 30 inches. The plants are true Giant Imperial type, branching from the base and early blooming, coming into flower about the same time as the Stock Flowered variety Rosamond. Coral King has been proclaimed by visitors to our fields the most desirable Larkspur color yet produced.

No. 4460 Price per oz., \$.45 Per lb., \$5.00

Approximately 8,770 seeds per ounce.

OTHER WORTHY 1936-1937 INTRODUCTIONS

No. 551-NICKELTYPES \$15.00

Nierembergia Hippomanica (Dwarf Cup Flower)

F ALL the hundreds of new flower introductions which have come under our observation during the course of the past few years, none has caused so much comment from visitors to our farms as this little Dwarf Cup Flower, Nierembergia Hippomanica. With the possible exception of Zinnia Linearis, it will outbloom any flower we have growing. It starts flowering when the plants are only about two inches tall, that is about 15 weeks after the seed is sown, and keeps on right up until the heavy frosts of late fall. It is at all times neat and tidy looking, the young flowers coming and covering the older flowers and seed pods. The lovely lavender blue shade, heightened by a touch of yellow in the center, is most charming. Plants are definitely dwarf, compact streamlined, if you will—and not over 5 or 6 inches tall, and with a spread of only 8 to 10 inches. Foliage is light gray green, very inconspicuous, and there are literally dozens of flowers in bloom at a time throughout the summer. As an edging plant, for the border along a walk, or to outline beds of larger flowers, it has no equals, while for use in the rockery it is unexcelled and is extremely lovely in a window box or in flower pots. It is a half hardy perennial which will winter over if given some protection. In the southern warmer sections, no protection will be necessary. The plants should be cut back at the end of the season and will send out fresh growth in the spring.

Marigold Collarette Crown of Gold Gold Medal ALI-AMERICA AN SELECTIONS 1937

IVEN more publicity than any other flower last season, Crown of Gold was the only Gold Medal winner in the All-America Selections Competition for 1937. Its main claim to glory is the fact that there is absolutely no trace of the characteristic Marigold odor in the foliage, stems or flowers. It is the first of what will, undoubtedly, be a new race of completely odorless Marigolds. The flowers, which are of medium size, about $2^{1}/_{2}$ inches in diameter, are a lovely golden orange shade with a full crested center of small tubular petals surrounded by a single row of broad guard petals. The plants are $2^{1}/_{2}$ to 3 feet in height, freely branched, with a sparse growth of foliage, not unusually showy in the garden, but with stems of good length for cutting. Crown of Gold is valuable as a cut flower variety, primarily, where it will be a boon to those who do not like or are sickened by the pungent Marigold scent. It is early blooming and stays in flower for several weeks.

No. 4792 Price per oz., \$.45 Per lb., \$5.00

Approximately 8,000 seeds per ounce.

Zinnia Gaillardia Flowered Finest Mixed (Navajo)

ANOTHER of the newer Zinnia types which resembles another flower group, the Gaillardia Flowered Zinnia does strongly remind one of the Picta Double Gaillardia. It is said to be a cross between the Haageana and Elegans types, resembling the Haageana in flower form and the Elegans in foliage and flower color. The flowers are very attractive, of medium size, about 2 inches in diameter, just a good size for cut flower use, and are carried on stems of medium length. The plants are about 2 feet tall and very free flowering. The colors range through the mellow tones of rose, pink, bronze, yellow, orange, lavender, and combinations of these colors. Most of the flowers, in fact, are two toned, with a ring of deeper color toward the center of the flower. Flowers will be produced about 45 days after seed is sown.

No. 1598 Price per oz., \$.45 Per lb., \$5.00

Approximately 4,500 seeds per ounce.

Petunia Grandiflora Single Plain Edged Burgundy Special Mention ALL-AMERICA SELECTIONS 1937

Burgundy is one of those rugged individualists of the garden, a strong growing type, with very showy flowers in a shade of deep red which is rather difficult to combine with other colors. Since, however, its own color is so showy in itself, it is well worth growing as an accent or specimen group. The flowers which are plain edged, are of good size and substance, the strong red contrasting boldly with the snowy white throat. The plants make a heavy growth and are very free blooming.

No. 5656 Price per 1/16 oz., \$1.60 Per 1/4 oz., \$4.80 Per oz., \$16.00

Approximately 200,000 seeds per ounce.

Petunia Balcony Royal Blue

POYAL BLUE is a very beautiful shade of deep, velvety purple-blue, similar to Elks' Pride in the Grandiflora group. The flowers are large and of fine substance, on plants which are strong growing, free blooming and very even in type. It is a very true stock and one well worth growing either in a garden bed or in a window box, where it is especially fine because of its trailing habit.

No. 5548 Price per oz., \$2.55 Per lb., \$30.00

Approximately 260,000 seeds per ounce.

No. 543-NICKELTYPES \$15.00

Cheiranthus Allioni Golden Bedder

OLDEN BEDDER was introduced last season as a companion to the orange Cheiranthus Allioni. The flowers are of good size, in a lovely shade of golden yellow, freely produced on neat growing plants about a foot high. It is especially fine as an edging plant or in the rockery, where it will add a brilliant touch of color. It is a hardy perennial which blooms the first year from seed.

No. 2982 Price per oz., \$.20 Per lb., \$2.00

Approximately 20,000 seeds per ounce.

Dianthus Madam Butterfly

ADAM BUTTERFLY is perhaps the most unusual of the newer flower introductions. It may be described as a Japanese Sweet William, and the flowers which have extremely elongated and laciniated petals, come in shades of pink, light rose and white. Individual florets may have a spread of 5 or even 6 inches and are produced on plants about a foot in height. It is a good border or edging variety, but its main use will be for cutting. The exotic, unusual looking flowers attract attention at once wherever they are used.

Primula Chinensis Double Dazzler

PRIMULA DAZZLER, the single form which was introduced some two or three years ago, is one of the most popular Primulas for pot plant growers. With the introduction of this double form in the same very dazzling orange scarlet shade, the wealth of material for pot plant users has again been enriched. Those who grow decorative plants for market realize and highly praise the value of Primula Dazzler as a pot plant. We feel sure, therefore, they will more than welcome this double form which is an even better market plant subject than the original introduction. The flowers are carried well above the attractive foliage and are very freely produced. The doubling of the petals intensifies the color and adds to the beauty of the plant, making the vivid orange scarlet flowers among the most showy of any pot plant variety. We are furnishing the originator's seed.

No. 6048.... Price per pkt. in originator's packets only, \$.75

Zinnia Scabious Flowered Autumn Tints

AUTUMN Tints is the latest development in the Scabious Flowered type of Zinnia. The strain is composed of a mixture of rich autumn shades, such as burnt orange, deep russet, bronzy red, etc. The flowers are of medium size, with the characteristic crested center surrounded by a row of guard petals, produced on plants $2\frac{1}{2}$ to 3 feet tall. The strain is particularly well adapted for cut flower use, but is not especially showy in the garden.

Godetia Upright Single Purity

7HILE Godetias are not generally grown by the home gardener, they are very important to the florist and cut flower grower. There has always been a demand for a pure, white Godetia, and this is now available in Purity, the very best white for florist use. The extra large flowers are beautifully frilled and hold their pure white color better than any other white yet developed. Purity is, therefore, doubly desirable. The plants are about 2 feet tall, free flowering, upright growing and very sturdy.

Approximately 46,000 seeds per ounce.

INTRODUCTIONS PRIOR TO 1936 BY BODGER AND OTHERS

No. 544-NICKELTYPES \$15.00

Marigold Dwarf French Double Harmony

ARMONY is without any question one of the very finest Marigolds ever introduced. It is in all respects outstanding. The flowers are charming and distinct, Scabiosa-like in formation with tubular deep orange center petals flanked by broad velvety dark maroon-brown guard petals. The plants are dwarf, about a foot high, compact, exceedingly free blooming and extremely early, coming into flower with us about June 1st. From all sections of the country we have had excellent reports on this variety, special notice being taken of the extremely early blooming habit. Harmony is 100% true to type, color and habit. Although it is strongly scented with the characteristic Marigold odor, this drawback is more than overcome by the attractiveness and unique beauty of the flower. It is excellent for use in the garden, either in beds or borders, and most attractive when used for cutting.

No. 4798 Price per oz., \$.30 Per lb., \$3.00

Approximately 10,000 seeds per ounce.

Dianthus Laciniatus Splendens Special Mention ALL-AMERICA A SELECTIONS 1935

SPLENDENS is the most striking Dianthus we have ever offered. Although it has been on the market in this country for some three years now, popular demand still keeps it in the active novelty class. It is neat, compact in habit, growing 6 to 8 inches in height and produces hundreds of its showy flowers throughout the season. There are dozens of flowers in bloom at a time on each of the little mound-like plants which remain in full flower throughout most of the summer months. The strongly sweet scented single flowers are large, about 2 inches in diameter, brilliant crimson with a vividly contrasting large white eye. A very showy plant, it has but few equals for edging or border use, or as a rockery subject, while the large, short stemmed flowers are fine in the miniature bouquets which are just now so popular. It is an easily grown, free flowering all around garden annual.

No. 3462.... Price per oz., \$.45 Per lb., \$5.00

Approximately 28,000 seeds per ounce.

No. 547-NICKELTYPES \$15.00

Calendula Double Orange Sunshine

MONG the newer flower types in the Calendula family, the Chrysantha type stands out as one of the best. The buttercup yellow Chrysantha or Sunshine was a Gold Medal Winner in the 1934 All America Selections, and Orange Sunshine, a golden orange companion to Chrysantha, was introduced a couple of seasons ago, a worthy running mate to its predecessor. The flower type is of the same informal loose formation, with long slender incurved petals, making a bloom of good size and of a type which is particularly pleasing for cut flower work. The firm strong stems are unusually long for Calendulas, on plants as much as 2 feet in height. For garden decoration or as a cut flower variety, Orange Sunshine is one of the best.

No. 2500 Price per oz., \$.30 Per lb., \$3.00

Approximately 4,000 seeds per ounce.

No. 549-NICKELTYPES \$15.00

Aquilegia Longissima Award of Merit, Royal Horticultural Society

ALTHOUGH Longissima grows native in California and other western sections of the United States and Mexico, it had to go to England for recognition before being generally introduced to gardens in this country. It was granted an Award of Merit after being shown at the Royal Horticultural Society a few years ago and since that time has enjoyed considerable popularity in its native land. The flowers are of striking formation, with deep yellow petals and paler yellow sepals, and extremely elongated spurs. These spurs may be 5 inches or more in length. The effect is at once dainty, unusual and arresting. The plants are from 2 to 3 feet tall, with characteristic bright green cut-leaf foliage and reddish stems. Flowers are produced during spring and early summer and are effective in the garden although much more so in flower arrangements

No. 2190 Price per 1/4 oz., \$7.50 Per oz., \$25.00

Approximately 17,500 seeds per ounce.

Aster Super Giant El Monte (Bodger)

Special Mention ALL-AMERICA A SELECTIONS 1936

ACH SEASON El Monte is grown, it becomes more popular. Last year we had very fine reports on it, but during this year we have had even better comments. It has more than fulfilled all expectations for it as the very finest, extra large flowered crimson Aster available. The color is a good strong crimson and the flowers, which are composed of abundant quantities of daintily interlaced plume-like petals, are extremely large and fluffy, a super giant form of the popular Ostrich Feather type. Each plant produces only 6 to 8 flowers, each one borne on a heavy, non-lateral basal branched stem. Since El Monte is unusually early blooming, coming into flower in early September, it can be grown in practically any climate. Although not wilt resistant, we recommend El Monte very highly.

Ipomea Clark's Earliest Heavenly Blue Morning Glory

THE beautiful sky blue of the Heavenly Blue Morning Glory is unquestionably one of the loveliest shades in any flower, a beautiful sky blue color which shades at the center to a golden throat. Throughout the south and other sections where Morning Glories are extensively grown, Clark's strain will need no introduction. It is the earliest flowering variety, makes a sparse growth of foliage and is heavily covered with flowers. These flowers are very large, of the characteristic Morning Glory form, and although they close by noon, the glory of their morning beauty cannot be equaled. For covering a fence or trellis, or climbing over a small building, the Heavenly Blue Morning Glory is ideal. As it is a tender annual, seed should not be sown until late in the spring. In order to get the greatest quantity of flowers from the strain, seed should be planted in a dry sandy location where the plants will receive as little water as possible and they should never be fertilized unless a heavier growth of foliage is required. If desired, seed may be started early indoors, but if so, should be planted in individual pots as Ipomeas do not transplant readily.

Approximately 675 seeds per ounce.

No. 529-NICKELTYPES \$11.00

Poppy Nudicaule the Emperor (Bodger)

TCELAND POPPIES are in the news. Gradually, it is true, but surely, they are coming forward to a prominent position in our garden consciousness. The Emperor is an exceptionally fine Iceland Poppy and stands forth quite in a class by itself. It is without a doubt the very finest orange Iceland Poppy ever produced, with extremely large flowers, composed of broad, overlapping fluted petals, many blooms having extra petals. The color is the same deep tangerine orange as that of our previous introduction, El Monte, while the strong, straight stems are very wiry, 18 to 22 inches in length and bear the large flowers majestically whether in the garden or when used for cutting. The stock is very true, early flowering and although a perennial, is treated as an annual, blooming freely the first year from seed.

No. 5860 Price per oz., \$1.30 Per lb., \$15.00

Approximately 448,000 seeds per ounce.

No. 313-ELECTRO \$2.10

Poppy Nudicaule Amurense Yellow Wonder

Special Mention 1936

ALL-AMERICA (A) SELECTIONS

THIS new, very large flowered bright buttercup yellow Iceland Poppy is an excellent running mate to The Emperor and The Empress. The stems are unusually long and wiry, 24 to 26 inches in length and the flowers will keep as long as ten days

when cut. It is somewhat later blooming than the Nudicaule varieties, is much more heat and drought resistant than any other Poppy and comes 100% true to color. The flowers are produced freely, making it a very showy subject in the garden as well as a profitable variety for the cut flower trade. Although a perennial, it blooms the first year from seed and is usually treated as an annual.

No. 5864 Price per oz., \$1.30 Per lb., \$15.00

Approximately 448,000 seeds per ounce.

Balsam Double Bush Flowered Torch

Dush Flowered Balsams are really not recent novelties, but they are not at all well known in this country, so to most of the gardening public are actually in the novelty class. Unlike the taller growing Balsams, the flowers in the little Bush Flowered type are carried at the tips of the stems, making a show of color rather than of foliage. The plants are 8 to 10 inches in height, very compact and literally covered with their double flowers. The variety Torch,

penetrating vermillion red in color, is perhaps the showiest. The strain may also be had in a mixture. However, we especially recommend Torch and suggest that you make use of it as an edging plant, in your rock garden, in your window boxes or in flower pots.

No. 2322 Price per oz., \$1.70 Per lb., \$20.00

Approximately 2,400 seeds per ounce.

Schizanthus Grandiflora Dr. Badger's Improved Giant Flowered Hybrids

To THE florist and conservatory man, the Schizanthus is one of the most important flowers for pot work. The improved strain of Dr. Badger's Giant Flowered Hybrids meets all the requirements of excellence. The flowers are very large, in a brilliant range of colors including all the shades of pinks and rose, through deep purple, but without any white. Each flower is daintily marked with a large golden blotch at the center. The plants are compact, neat in habit, 12 to 14 inches in height, extremely free blooming and most attractive. Dr. Badger's Improved Giant Flowered Hybrids is an outstanding strain for the best florist trade.

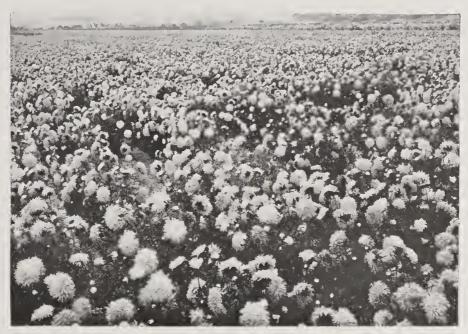

No. 6352.... Price per oz., \$2.15 Per lb., \$25.00 Approximately 46,000 seeds per ounce.

Rudbeckia Hirta Hybrids

POR a hardy, easy to grow cut flower plant, the new Hirta Hybrids of Rudbeckia are excellent. The flowers are all large and single, in a mixture of attractive shades ranging from deep mahogany through lighter bronze, deep and light shades of orange, to yellow. None of the flowers have a center zone, but are a pure solid color. The plants are 11/2 to 2 feet in height and have several stems of flowers coming on throughout the summer. Hirta Hybrids is an annual and grows easily from seed sown in early spring, flowering about five months after sowing.

No. 6138.... Price per oz., \$.70 Per lb., \$8.00 Approximately 78,700 seeds per ounce.

ASTER WILT

We have had so many inquiries as to just what wilt resistance in Asters really is that we feel a few notes on the subject are in order at this time.

The so-called wilt disease of Asters is caused by a specific parasitic fungus, which may attack the plant at any stage in its growth from the seedling to the seed-producing age. The spores of the fungus may be carried on Aster seed and on inert matter with the seed, on the implements used in preparing the soil, and in the soil itself. When once introduced into the soil, it persists indefinitely and makes the land "aster sick," that is, whenever an ordinary strain of Asters is planted into that particular soil at any time thereafter, the wilt fungus living in it will attack the plants and they will die off at some stage of their growth.

A wilt resistant strain of Asters, however, is one which, although planted on the very sickest soil available, will withstand the attacks of the fungus and develop into strong, healthy plants. Just as some people or animals withstand the attacks of certain diseases, while others become sick at the first sign of an epidemic, so the resistant strains of Asters will withstand the attack of the wilt fungus, while the non-resistant strains will succumb.

See our Bulletin No. 2, Asters of Today, for full details on Aster diseases and culture.

Comparative Zinnia Flower Types
No. 322—ELECTRO \$2.90

ZINNIAS a

We have been Zinnia specialists for many years, taking the lead in their development ever since our first outstanding Zinnia introduction, the Dahlia Flowered strain, which was rightly named a New Flower for the People. This type, developed in our experimental department and introduced by us in 1919, was the turning point which changed completely the status of the once unpopular Zinnia family. Since this time, we have developed and introduced many new types and varieties in the now extremely popular Zinnia group. Many additional varieties are in the process of development in our Zinnia workshop and will be presented within the course of the next few years. See our Bulletin No. 1, The Zinnia and its Uses, for full details on Zinnia Types and Culture.

TALL, LARGE FLOWERED TYPES

BODGER'S GOLD MEDAL DAHLIA FLOWERED f (Bodger) (G.M.,R.H.S.'24)

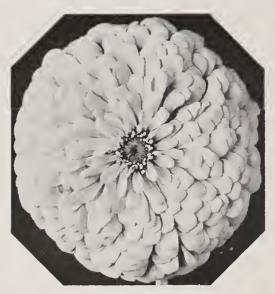

The Dahlia Flowered strain was introduced by us in 1919, and all the colors have been of our introduction at various times since then.

The plants are of medium height, $2\frac{1}{2}$ '-3', very robust, bearing many strong stems of the fully double, huge flowers which resemble the show type of Dahlia. We have marked the most popular varieties with an asterisk (*).

BODGER'S CALIFORNIA GIANT or MAMMOTH f (Bodger)

Introduced by us in 1926, this type has rapidly gained in popularity. The plants are taller than the Dahlia Flowered type, 3'-4', with long stems which adapt it particularly for use as a cut flower. The flowers are very large and flat, giving a graceful effect.

Zinnia Haageana Mexican Hybrids No. 29-ELECTRO \$2.25

HAAGEANA DOUBLE (Mexican Hybrids)

The small flowered Mexican Zinnias have a charm all their own. The smaller flowers lend themselves to bedding and make a brilliant display and yet have stems long enough to make fine bouquets for small vases and bowls. The mixture contains many attractive colors and color combinations.
